Research Interests (Keywords)

Cognitive neuroscience of language; aging and language attrition; language–memory interactions; psycholinguistics; Chinese sentence and lexical-semantic processing; statistical modelling of behavioral/EEG data; reproducible research; Chinese NLP; lexical ambiguity and homonymy; human–LLM comparison; interpretable evaluation and benchmarking.

Teaching Interests (SDS)

Statistics and modeling for behavioral/cognitive data (R/Python); experimental design and reproducible research.

Natural language processing for Chinese; LLM evaluation/interpretability; human–AI comparison for language understanding.

Academic Profile

I am a cognitive neuroscientist of language trained in psycholinguistics/neurolinguistics and clinical linguistics. My research investigates Chinese sentence and lexical-semantic processing and how aging-related changes in declarative/procedural memory contribute to language attrition and production–comprehension asymmetries. Methodologically, I combine controlled behavioral experiments (lab and online) with rigorous statistical inference, and where applicable EEG/ERP, to develop mechanistic accounts of language–memory interactions.

In parallel, I build data-centric resources and reproducible computational pipelines for Chinese lexical ambiguity research, using large language models (LLMs) as computational hypotheses and developing interpretable evaluation tasks and open datasets with transparent code and analysis reports. I am prepared to teach effectively in English at undergraduate and graduate levels, including courses in experimental methods, statistics for behavioral/data science, and NLP/LLM evaluation for language data.

Academic Appointments

Postdoctoral Fellow (博士後研究員) — The Hong Kong Polytechnic University (PolyU)

Research Center of Language, Cognition and Neuroscience; Department of Language Science and Technology · 2024–present

- Research design and experimentation; institutional and clinical collaborations
- Conference session organization and chairing
- Grant applications (e.g., HK GRF) and postgraduate exchange coordination

Research Associate (助理研究員) — The Hong Kong Polytechnic University

2023–2024

- Research dissemination and publication
- Proposal development (e.g., NSFC)
- Support for PhD student training and supervision

Research Assistant (研究助理) — The Hong Kong Polytechnic University

2018–2019

- Research on Chinese *bǎ*-construction; data collection and analysis; manuscript preparation
- Contributed to two research papers

Education

Ph.D. in Neuro-cognitive Studies of Language and Clinical Linguistics — The Hong Kong Polytechnic University

2019–2023 · Supervisor: Prof. William Shiyuan WANG

Dissertation: *An experimental investigation into older adults' production/comprehension asymmetries and declarative/procedural memory contributions: a Chinese context*

M.A. in Linguistics and Applied Linguistics — Nankai University

2013–2016

B.A. in Teaching Chinese as a Second Language — Nanjing University of Information Science & Technology

2009–2013

Research Program (3–5 years)

1. **Mechanisms of language attrition in older adults:** Behavioral and (where applicable) EEG/ERP studies of aging-related changes in comprehension/production, with a focus on declarative/procedural memory contributions.
2. **Human–LLM comparison for Chinese lexical ambiguity:** Interpretable tasks and evaluation protocols quantifying how context and grammatical cues drive disambiguation in humans versus language models.
3. **Open resources & reproducible pipelines for cumulative research:** Normative databases (e.g., meaning-specific AoA, meaning dominance) and benchmark datasets for Chinese homonymy/polysemy, released with code and reproducible statistical reports to support student training and community reuse.

Open Research Artifacts (Code & Data)

- **[EMNLP 2025 Main]** *Context and POS in Action: Chinese Homonym Disambiguation in Humans and LLMs* — official implementation and reproducible analysis pipeline.
  https://github.com/neurothew/context-and-pos-in-action
  Contents: LLM judgment generation notebooks; angular similarity computation; stimuli/data; reproducible statistical report (R Markdown).
- **[ACL 2025 Findings]** *Exploring Layer-wise Representations of English and Chinese Homonymy in Pre-trained Language Models* — official implementation (computation + statistics).

https://github.com/neurothew/exploring-homonym-rep-in-llm
Contents: computation scripts; data tables; results; reproducible analysis (R Markdown).

- **Meaning-specific AoA of 562 Chinese homonyms (ongoing normative database)** — dataset repository (MIT license).
  https://github.com/Patrickbigbig/meaning-specific-AoA-of-562-Chinese-homonyms
  Planned release: meaning-specific AoA norms (562 homonyms); anonymized raw ratings (N=160); R Markdown analyses.

Academic Service

- **Reviewer:** *Frontiers in Psychology* (2025)
- **Session Chair:** "Aging and Language Degeneration" Session, 15th International Conference in Evolutionary Linguistics (2024)

Teaching Experience

Invited Teaching

- **Invited Lecturer** (2026). *Evolutionary Linguistics: Phylogeny and Ontogeny*, National Summer Institute in Linguistics (Organizer: Nankai University). Language: Mandarin.

Teaching Assistant (English-medium)

- **Teaching Assistant** (2022). *Advanced Topics in Psycholinguistics and Neurolinguistics* (Postgraduate), PolyU. Duties: tutorials, grading, office hours.
- **Teaching Assistant** (2021). *Contrastive Analysis of Chinese and English* (Undergraduate), PolyU. Duties: tutorials/discussion sections, grading, answer keys and supplementary notes.

Instructor of Record

- **Advanced Spoken Chinese Instructor** (2016). University of Wisconsin–Madison Tianjin Summer Chinese Program. 10 weeks; 4 contact hours/week; class size 5; students: U.S. undergraduates. Duties: course design/delivery, assessment, student support, curriculum coordination, co-curricular activities.
- **Elementary Chinese Instructor** (2015). Nankai University × Aichi University Program. 16 weeks; 8 contact hours/week; class size 12; students: Japanese university students.

Mentoring

- **Mentor**, PolyU Junior Research Mentoring Programme (2021)

Awards & Honors

- **Best Oral Presentation Award**, The 4th Macau Symposium on Cognitive and Brain Sciences (2023)
- **Top Ten Graduate ("南開十傑")**, Nankai University (2016)

Methods & Technical Skills

- **Programming / Data:** R, Python, JavaScript; reproducible reporting (R Markdown)
- **NLP / LLM Tooling:** Hugging Face Transformers; HanLP; corpus/text analytics
- **Data Visualization:** ggplot2, matplotlib, Gephi
- **Experiment & Speech Tools:** PsychoPy, lab.js, Praat
- **Experimental Methods:** behavioral experiments; EEG/ERP; online data collection
- **Languages:** Mandarin (native), English (fluent), Japanese (intermediate)
